SUMMIT Exterior Solar Screen

Summit is Corradi's signature and most popular screen system, exclusively designed and manufactured in the U.S. to provide versatile enclosure solutions that protect and enhance outdoor spaces. Featuring a standard curved front cassette with an optional square upgrade, Summit adapts seamlessly to various architectural styles and offers multiple side-guide options, including the ShyZip® Spring track system and cable guides. It mounts easily to ceilings or soffits with standard brackets and can be upgraded for wall attachment applications, supports widths up to 18 feet and heights up to 16 feet (fabric dependent), and is available in 9 matte finishes with optional custom RAL upgrade to perfectly complement any outdoor environment.

Summit is available manual or motorized to fulfill any solar control preference. The manual option has a detachable crank and can be used up to the manual maximum length of 16 feet wide. Any shade more than 16 feet wide must be motorized. Motor configurations include a wired switch controlled motor or wireless remote-controlled motor. Corradi USA offers the latest motors from Somfy® and can be integrated into most home automation systems. Also, the wireless options can be used with a sun & wind sensor to automatically operate under specific conditions.

FRAME COLORS

POWDER COATING*

The aluminum extrusions are painted with certified Qualicoat cycle epoxy powders.

*RAL CUSTOM COLOR POWDER COATING IS ALSO AVAILABLE
Differences in color tones in this brochure may occur due to the reproduction technique, therefore these finish images should not be used for final production specifications.
